SR 0611, Section ERM Emergency Rock Slope Mitigation Project
Delaware Water Gap Borough, Monroe County, PA
Phase I Project Online Public Meeting

The Pennsylvania Department of Transportation Engineering District 5-0 (PennDOT) and the Federal Highway Administration have begun planning and design work for the stabilization of the rock slope along the west side of SR 0611 in Delaware Water Gap Borough, Monroe County, Pennsylvania. This is the Phase I project. The scope of Phase I consists only of scaling to remove loose rock throughout project area within PennDOT's right-of-way. SR 0611 is currently closed to traffic due to the public health and safety concerns of the unstable rock slope along the roadway. The proposed project will reopen SR 0611 for safe and efficient transportation for the traveling public.

The purpose of this letter is to invite you to view the plans display available at the following website:
<https://www.penndot.pa.gov/RegionalOffices/district-5/PublicMeetings/Monroe-County/Pages/default.aspx>.

Thank you for your understanding as we make every effort to maintain the project schedule and ensure we are soliciting feedback from affected stakeholders. Should you have any comments or require additional information on this project, please contact, Brandy Rotz, ACIP, Consultant Project Manager at 717-540-6040 or by email c-brotz@pa.gov.

Sincerely,

A handwritten signature in black ink that reads "Christopher J. Kufro".

Christopher Kufro, PE
Acting District Executive
Engineering District 5-0
