

NOTICE OF ROAD WORK

Borough of Delaware Water Gap
49 Main St. Delaware Water Gap, PA

Beginning on Thursday October 5th, Asphalt Maintenance Solutions will be in the Borough applying rubberized crack seal on our streets. This road preservation work is expected to be continued on Friday October 6th and Monday October 9th. Street cleaning is scheduled for Wednesday October 4th to prepare the surface.

We ask that all cars (and any other property) be moved off the streets listed below from Wednesday-Friday and Monday. Once you see that your street has been freshly crack sealed you may resume parking on it. This request does not apply to the weekend as the crew will not be working on Saturday or Sunday.

We will see the best results from the project if the work crew has unimpeded access to our entire road surface from shoulder to shoulder. Your cooperation is appreciated.

Expect localized single lane restrictions, detours, and possible delays during this work. If you have any questions or concerns, please reach out to me.

Zack Booth
Council Vice President
Borough of Delaware Water Gap
